

Instructional Plan

Purpose

The purpose of this plan is to provide effective education to our student population. It is also to guide the work of faculty as they integrate their teaching and learning approaches throughout the curriculum. The ultimate goal is to increase student learning and retention.

Methodology

1. Students enroll in program and sign enrollment agreement on or before they start the course. At this time the enrollment agreement will be gone over with them, rules and regulations will be explained, and students will be given instructions on how to access the Catalog and Handbook at least one week prior to classes beginning. Students are to read the catalogue and come on the first day of class with a signed form saying that they have read and understood the catalogue and Handbook. Any orientation that students will need will be provided to them before and on the first day of class.
2. On Orientation day, students will be given instructions on how to obtain the books their class requires. Other books are included as part of the program costs.
3. Instructor will introduce him/herself and an overview of the classroom rules and expectations will be gone over.
4. Instructor will let the students know what they will cover in class by means of the Syllabus, which student signs.
5. Instructors are to follow lesson plans that have already been developed, reviewed and approved by program director in conjunction with faculty and based on curricula, previously reviewed by advisory committee.

6. Instructors are to teach according to curriculum guidelines. Lesson plans will follow curriculum guidelines and integrate pacing, assessments, and standards. Lesson plans must include employability skills and critical thinking.
7. Instructors must devote class time to health and safety in the workforce.
8. Quizzes, a mid-term and a final will be given throughout, to document and assess students' abilities and progress.

In the PT Externships, The ACCE is a full-time SABER College employee in the Physical Therapist Assistant Program charged with administering the clinical education component of the program and coordinating with the clinical affiliates. Clinical instructors are officially recognized by the college as Affiliate Faculty and have all the responsibilities, rights and privileges accorded to this position. As this is a voluntary, non-contracted position, affiliate faculty members receive no compensation in the form of salary or benefits from the college but SABER will invite them to college events such as lectures and workshops as appropriate. Clinical Instructor privileges include: Official recognition as SABER College Clinical Affiliate Faculty; attend all PTA Program college events such as lectures and workshops as appropriate; attend and/or participate in all PTA Program events.

9. If students have any problems, complaints, or grievances they should be told to the teacher who will try to correct the problem. If the problem cannot be handled by a teacher then the grievance must follow the order set about in the catalogue as follows:

Grievance – A student who feels he/she may have been unjustly treated may appeal the policy or procedure. The purpose of this process is to provide an equitable process of resolving student grievances. Student with a complaint should discuss it first with their instructor. If conflict is unresolved, student may then submit a written grievance and meet with the Director within three days of having met with instructor. Director must inform DAA, who will in turn inform SABER College's Chief Executive Officer of the grievance within 24 hours of meeting with student. If at this point conflict remains unresolved, student can then meet with the Academic Affairs Committee, comprised of faculty and administrative staff. The student will be able to equitably express their position on the issue, and if available, provide documentation to substantiate their position. The Academic Affairs Committee will consider all sides and render a decision on the disposition of the policy violation or other issue. Provisions for resolutions shall be concluded within ten (10) business days after receipt of the written grievances.

In cases when these informal meetings do not resolve the conflict, student may then appeal and file a grievance to:

Commission for Independent Education

325 West Gaines Street
Suite 1414
Tallahassee, FL 32399-0400
(850) 245-3200

Council on Occupational Education

7840 Roswell Road, Building 300
Suite 325
Atlanta, Ga. 30350

Commission on Accreditation in Physical Therapy Education (CAPTE)

1111 N Fairfax St.
Alexandria, Virginia
(703) 706-3245
www.capteonline.org

10. Once hours are completed and students finish the coursework satisfactorily, students will receive a grade. If the grade is passing they will then be given a diploma or Degree. Students who fail the final exam may take it a second time; if they fail, they must go back and take the course again.

Externships

1. Students that have to complete an externship must complete and submit all documents or required paperwork prior to being admitted to the externship. If the paperwork is not complete then the student will be denied admission to the externship.
2. All externships are supervised by a designated person at the on-site facility. This person will be responsible for guiding and overseeing the students' learning experiences and will participate in the students' evaluations. The externship is for a relatively short period of time, and during this time the students will be gaining experience in their field of study. During the externship students must complete

whatever training is required by the training site, and afterwards they will partake in work based activities that were designed with learning day to day job activities in mind. This on-site instructor will complete student evaluations for that portion of the program.
