

Placement Services

Purpose

The school's philosophy, to prepare individuals to become productive members of this society, is nowhere else as important as in this plan. This plan and its methodology directly support the goals and purpose of the school in general and is the basis by which the mission of the organization is attained. To prepare the students to meet the demands of the workforce is key to the functioning of the school and directly affects the outcome of the student population in general. Services provided by the school are culturally and linguistically compatible with the community, and by providing a sound placement and follow up plan, the school not only helps the students attain self-sufficiency, but achieves the goals set forth on the following paragraphs.

Placement:

Because of our many years of service to this community, we have developed a highly successful placement component in the organization. Career Services Specialist maintains this relationship with the private sector to be able to offer students excellent job opportunities. Before the student completes training or if the staff identifies the need of a student for employment services, during the training, the student is counseled and assisted in obtaining employment. Regular staffing sessions occur between the faculty, the Program Director and Student Advisor to identify the need for employment of any particular student, the level of expertise already achieved by each student, their readiness for employment and their projected dates of completion. Based on this information provided by the faculty, the Career Services Coordinator (CSC) and Student Advisor are then able to assess job readiness.

In our PTA and Professional Nursing programs students must first take a licensure exam before being able to be placed in a job. The student completes the program of study and then the student is assisted in obtaining test date. Once the student has taken the exam, the score is received by the school and then it is put in the student file. In order to gain employment, the student must pass the licensure exam. Once the student has passed the exam, then the Career Service Coordinator and Student Advisor are then able to assess job readiness. In the ESOL component the student will be aided by the Career Services Specialist in obtaining a job compatible with previous job experiences or better

The placement services are carried out by the Career Service Coordinator, and serve the needs of the entire school. The students are informed that although employment services are offered, employment is not guaranteed. The Career Services Coordinator maintains a listing of employers that they use for all students. This list includes old and new contacts in the business area and will be updated as contacts change through time.

The Dean of Academic Affairs, the Program Directors, the Career Service Coordinator and the Director of Executive Affairs are familiar with Employability Skills Training (EST) techniques, and during the school year and especially at the beginning of the program and during the students last semester, they, or their designees, take the time to meet with students and provide this training, which includes but is not limited to orientation on: learning to find job leads, developing a résumé, filling out job applications, etc. Staff are cognizant of the various employment sites ranging from Employ Florida, the local employers, and the Student Advisor works with student directly to provide job leads, specific job development and job matching to jobs available in the community and those listed in various government and private job banks on the web. In the event a student is interested in market and job availability, the student will be directed

to review the List of High Demand Occupations published by the Department of Labor.

All placement services are available to all students without additional charge.

Placements are documented using Saber's Verification of Employment / Placement Form. The Career Service Specialist contacts employees/employers to verify information.

All placement records are maintained in the student's file. The Graduate Exit Survey and the Verification/Evaluation Form, the Placements and placement rates are a significant

instrument used by the Advisory Committee, staff and instructors to evaluate the

effectiveness of the trainings being offered and improve the quality of the programs.
