

Plan for Professional Growth of Faculty

Purpose

The Professional Growth Plan is designed to foster personal and professional growth and development of faculty, to enhance their teaching effectiveness and the effectiveness of student's learning. Each instructor will develop, implement and complete annually an individualized Professional Growth Plan. The plan will be developed in collaboration with the program director. Instructors are encouraged to self-assess as a beginning activity and subsequently choose their growth goals.

Methodology

1. All full-time or part-time instructors shall assume responsibility for completing a professional growth plan during each school year.
2. All faculty must submit their annual professional growth plan in writing for review by June 30th to the director.
3. All instructors shall develop plans that foster self-assessment, improvement of practice, professional growth. Plans should be meaningful and relevant to the particular current position.
4. Each Professional Growth Plan shall include: a) areas where an instructor may choose to grow and develop professionally in the area which they are providing instruction and are self-selected and b) an estimated completion time – first meeting in the fall to present plan and second meeting at the end of the academic year to summarize and close the plan
5. All faculty shall provide the director with a report on or before June 30th. The report shall include specific indicators that support the degree of completion.
6. The director shall determine whether the instructor has completed an annual professional growth plan that complies with SABER's policies.
7. The director will keep a copy of the teacher's current annual professional growth plan and supporting documentation in the school. One year following completion, all plans and

documentation shall then be returned to the instructor. Instructors who want their plans included in their files may so inform the director.
