

Programs & Institutional Follow Up Plan

Follow Up:

Follow-up is an integral part of the employment services component. Students are informed while receiving EST training, and later while working, that staff is available at all times to counsel the student in cases where he/she may be having difficulties with a new job. While studying, the students are free to discuss with their advisors any problems they may have that may interfere with their attendance at the schools. This support service is extended with the dual purpose of aiding the student to stay in school and assisting with job retention. It is the intent of this student retention to assist students while in school to be able to continue to attend school and also assistance to help these customers placed into jobs, overcome any problems that may arise during this critical post placement period and to ensure further progress toward long-term employment and therefore self-sufficiency. Any follow up information is reflected in the Verification/Placement Form and filed in the student's record. Both the instructors and the students are involved while the students are attending school.

METHODOLOGY

To achieve the above mentioned objectives a work statement has been developed as follows:

Placement:

- 1 Meet with student at the onset of the program of study and develop open lines of communication.
- 2 Explain to the student the availability of placement orientation services.
- 3 Clarify that the student offers placement services, but does not guarantee employment.
- 4 Complete narrative report on meeting with student

- 5 Have student sign a Release of Information form for employment to be able to verify employment while student is working.
- 6 Discuss with the student the need to acquire work maturity skills, and introduce student to the concept of Employability Training.
- 7 Give the student a SABER Handbook and Pre-Employment Skills Training and ask that he/she read it and familiarize him/herself with it. PES is readily available online for students.
- 8 Encourage discussion as to student's likes and dislikes, abilities and skills to be learned.
- 9 Work with student to identify job leads, access and assess jobs by calling employers in the community, and make career decisions based on their chosen program of study.
- 10 Work with students on accurate construction of resumes, job applications, etc., Prepare students for job interviews.
- 11 Assess students, as to their needs for part-time/full time employment during training and a month before completion of training.
- 12 Discuss student's short term needs and goals
- 13 Discuss student's long term needs and goals
- 14 Identify a career path to be followed by student on actualizing their long-term career goals.
- 15 Meet with student during school year and on the last semester before they graduate, review their resume and work with student in identifying job leads which have been previously developed.
- 16 If student is in a program of study where they must take a licensure exam in order to gain employment and student has passed the exam, work with them to identify job leads, access and assess jobs based on their newly acquired license.
- 17 Help student on arranging the job interview using the skills learned. Advise student to inform SABER as soon as job is obtained

18 Complete the Placement Form and file it in student Case Record.

Follow-Up:

1. Complete the Placement Form
2. Identify on a calendar when the 5 day follow up is due and six months follow up
3. After employment begins, contact graduate to see how they are doing in job, and inquire as to any problems they may be encountering.
4. Conduct 5 days follow up and six months follow up
5. In case there is a problem, suggest services offered in the community, if possible, such as child care, transportation services, or any other information that the graduate may need to conquer barriers.
6. Any areas of concern that may be expressed by an employer are to be reflected in the case record
7. Use information obtained from employer to evaluate appropriateness of the program
8. Report any areas of concern to the directors, that they may be reviewed and shared with the advisory committee to evaluate program content, etc.
9. Advise student that staff is always available for any concerns or career counseling that graduate may desire.
10. Submit all placement information to Directors or Dean to construct the annual report.

All placement information is submitted to the Commission for Independent Education (CIE) and the Council on Occupational Education (COE) as part of the Annual Report. Outcomes are discussed with instructional and administrative staff, as well as with Advisory Committee, in order to evaluate the effectiveness of the programs and to develop methods to improve program outcomes.
