

Plan for Systematic Institutional Program Outcomes

Purpose

The purpose of the Plan is to verify that the institution evaluates program outcomes through a systematic plan for assessing program effectiveness, efficiency, and relevance by achieving specified quantitative requirements for: (a) program completion, (b) retention and job placement, and (c) licensure examinations while at the same time having employers satisfied with the education that students received from the college. Instructors maintain systematic processes to measure student progress.

Methodology

SABER College begins systematic evaluation of program outcomes when the student makes the initial application for enrollment and continues documentation throughout enrollment, placement and licensure examination when needed.

SABER has developed a structured process used to evaluate and measure learning performance:

1. Course syllabi are distributed at the beginning of each course by instructors, and contain course description, competency areas course objectives, policies and procedures, requirements of the course, the course content, and methods of evaluation, and other information pertinent to the student's successful completion of the course.
2. Students are graded throughout the semester by instructors.
3. Student file maintains students' grades on course assignments, instructors use a variety of means to communicate student performance and maintain a record of student grades. A record is maintained by Student Advisors as well.
4. All programs employ a systematic means of measuring student progress and are in full compliance with standards.
5. All means of evaluating student's performance are used in accordance with the criteria set forth in the course syllabus to calculate a semester grade
6. Semester grades become a part of the student's transcript
7. Students are evaluated on work ethics in each course by instructors
8. Instructors and academic advisors counsel with students throughout the semester to help improve work ethics and grades.
9. Final evaluation becomes part of the students transcript
10. Academic advisors maintain a record of student progress toward graduation

11. When a student leaves the college, the student advisor completes the Student Data Report, which is submitted to the Dean of Academic Affairs or Program Director. These forms are utilized to document status information on leavers, no shows, first time enrollments, ethnicity, sex, completers and placements.
12. The information regarding completion is verified by the Student Advisor for accuracy and submitted to the Program Director or Dean of Academic Affairs for completion of the student Final Record and the Diploma. The completion data is verified by the instructors and reflected on the Final Record form (Transcript) and the Diploma issued to the student.
13. The Graduate Student Exit Survey is administered to the student and it rates the program effectiveness and level of satisfaction with the education that was received.
14. All data received from students is shared with instructors, administration and Advisory Committees and is used as a baseline for any changes that should occur with the program

A written Placement and Follow-up Plan guides graduate and placement follow-up activities. A systematic and ongoing approach is utilized along with collaboration between faculty, staff, students, and administration. Placement and retention data is recorded and reported each year in the school's annual report to the Commission which compares the institutions' overall retention and placement rate with those of all other similar institutions accredited by the commission.

1. Each program is assessed annually, based on meeting or exceeding benchmarks for four key performance indicators – enrollment, retention, placement and passing rate. These evaluations are conducted by Student Advisors, Program Directors and Dean of Academic Affairs
2. Career placement assistance is offered to currently enrolled students, completers and degree and diploma graduates by Career Services Coordinator
3. Career placement is a collective effort between faculty, Student Advisors, students, Career Services Coordinator and administration
4. Placement data is also documented in the website and on several reports prepared by SABER's Director of Executive Affairs.

5. Student Advisors provide placement data on graduates and leavers to the Program Director or Dean of Academic Affairs.
6. A detailed run down of all that is needed for placements services is found in the Placement and Follow Up Plan
7. The Program Director/Student Advisors, or Dean of Academic Affairs input this information into the Student Data Report. Placement data is tracked throughout the year and reported at the end of each academic year by the Student Advisors.
8. The student reports their place of employment and other information required in the Employment verification Form
9. At the end of the year and upon placement the employers are contacted and are asked to complete the Employee Verification/Evaluation Form.

SABER is keenly aware of the importance of follow-up activities in order to ensure that proper documentation is captured and maintained for each student. State exams are administered to our RN and PTA students at the end of their program and results are posted on the National Council of State Boards of Nursing (NCLEX) and the National Physical Therapy Examination (NPTE) respectively.

1. Students are prepared to take the State Exams throughout the course of the program and they are specially trained to take the exam on the last semester of the program. There is an instructor, especially assigned to offer these classes
2. RN students are trained and tested on a weekly basis during the last semester and are offered remediation training while they wait to take the exam. They are administered a Comprehensive exam and if they pass they are administered a HESI exam prior to graduation. The PTA students In addition to their specific training at the end of the program are administered the Online Advantage NPTE – PTA Exam
3. Scores of test results are posted quarterly and are recorded by Program Directors. These are reviewed by instructors and administration.
4. Results of pass/fail scores are reported to COE on a yearly basis by the Accreditation Coordinator
5. Information is shared with instructional staff, administrative staff, Advisory Committees and posted on the website once a year.
