

Training Plan for Work-Based Activities

Purpose

The purpose of this plan is to provide effective education to our student population. It is also to guide the work of faculty as they integrate their teaching and learning approaches throughout the curriculum. The ultimate goal is to increase student learning and retention.

Methodology

1. In the PTA Externship, there is an Academic Coordinator of Clinical Education (ACCE): The ACCE is a full-time SABER College employee in the Physical Therapist Assistant Program charged with administering the clinical education component of the program and coordinating with the clinical affiliates. There is a Clinical Instructor (CI): Clinical instructors are officially recognized by the college as Affiliate Faculty and have all the responsibilities, rights and privileges accorded to this position. Affiliate faculty must meet the requirements for professional, experiential and/or scholarly preparation established by CAPTE for the program in which they are teaching.
2. In the Professional Nursing Program (AS), the instructors accompany the students to the training sites.

Externships

1. Students that have to complete an externship must complete and submit all documents or required paperwork prior to being admitted to the externship. If the paperwork is not complete then the student will be denied admission to the externship.
2. Students that are accepted receive orientations and documentation that specifies the objectives that must be met, the experiences that the student will undergo, the

competencies expected from each student and lastly the evaluations that will be conducted by the faculty.

3. All externships are supervised by a designated person at the on-site facility. This person will be responsible for guiding and overseeing the students' learning experiences and will participate in the students' evaluations. The externship is for a relatively short period of time, and during this time the students will be gaining experience in their field of study. During the externship students must complete necessary training required by the training site, and afterwards they will partake in work based activities that were designed with learning day to day job activities in mind. This on-site person will complete student evaluations for that portion of the program.
4. Students receive a value which is comparable to a stipulated letter grade or a P/F for the externship portion of the program. In the PTA program, students must pass all fourteen criteria of the CPI on all three externships.
